Art Unit: 3643

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10 are, drawn to an apparatus for removing bones from a fish fillet.

Group II, claim(s) 11, drawn to a method for removal bones from a fish fillet.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

1. The apparatus claimed is not "specifically designed for" carrying out the process, and/or,

2. there is no common "special technical feature" because the general inventive concept set forth, for example, the claim language of claim 1, does not define over the teachings of the prior art, for example the reference to Grabau et al (US Patent 6,322,437) teaches an apparatus for removing bones from a fish fillet including a supporting frame, a conveyor, a first supporting means arranged on said conveyor, a bone removal unit, a second supporting means arranged sidewise to said first supporting means, means for providing an attractive force between said first and said second supporting means. Said first and second supporting means define a gap there between.

As a result, it is believed that the respective independent claims 1 and 11 lack unity of invention. The Applicant is required to elect a single group of invention between Group I and II.

A telephone call was made to Stephen Bent on 08-13,2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3643

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
